RE: Monthly **Engineers' Report (NO PLANNING OR SEO ITEMS)**

As an update, this office has worked on the following matters this past month. We could answer any questions or would welcome feedback and direction on any and all matters.

1. **Knobby Hill Stormwater**. As a follow up to last month's Board meeting we will continue our work on the final design and bidding documents.
2. **Township garage site improvements**. As a follow up to last month's Board meeting we will continue our work on the grading and driveway layouts.
3. **Zoning & Stormwater Follow up**
  - a. **2747 Valley View Road (DIEHM)**. We are awaiting contact by the owner to discuss with his site Engineer to develop an overall stormwater plan for further review and compliance.
  - b. **501 Edwards Road (Glick)**. This office had forwarded the Board with further correspondence and details related to the zoning permit issued (2014). And are awaiting direction on this matter.
4. **Historic Poole Forge (Streambank) PERMIT EXPIRATION**. As directed earlier, we will prepare the appropriate permit extensions for the NPDES permit to be consistent with the Join Permit expiration date. We made initial contact with the Conservation District for filing the appropriate forms and will follow up in the coming weeks accordingly.

We also worked on various other items that have come before us as needed and will continue them as needed and directed.

Respectfully,  
**Vision Engineering, Inc.**  
Caernarvon Township Engineer
